

## Research Associate (RA) / Senior Research Associate (SRA)

### Our organization

FairJourney Biologics is a world leading CRO on antibody discovery, engineering, characterization and production. It provides services to Big Pharma companies and top biotech's from the U.S., Europe and Japan. Its state-of-the-art facilities are located in Porto, Portugal. For more information, please visit [www.fjb.pt](http://www.fjb.pt).

Company language: English

### The role

As an RA/SRA you are responsible for the generation of antibody panels using different antibody discovery and engineering platforms. Your main tasks and responsibilities are:

- Designing experiments and performing lab work to support antibody discovery and engineering projects
- Work within a team following the company standard operating procedures to ensure efficiency across projects.

### Your profile

To expand its discovery and engineering team, FairJourney Biologics is seeking a scientist, with the following characteristics:

- You have a MSc/PhD in the relevant field;
- You have several years of lab work experience;
- You have an excellent command of the English language;
- You are a practical scientist who can work independently but also with other scientists;
- You have excellent organization skills;
- Experience with antibody engineering and phage display is preferred.

### We offer

- Permanent position;
- Integration in a highly motivated team;
- Working in an international environment;
- Bonus incentives;
- Career development;
- Significant tax breaks may apply if you are a foreign or Portuguese expat.

You would report directly to Senior Scientists.

Applications must be submitted in English, directly through our website, at <http://fjb.pt/job-opportunities/>. Please use "Reference 17" for this position.
